

Iraq September 2002

Adopted at National Conference, Sept 2002

- The Australian Greens support a non-nuclear independent foreign policy.
- We view with alarm the proposals to wage a war on Iraq, particularly led by the US and UK governments.
- We strongly oppose the Australian Government's support for and involvement in a war on Iraq.
- We strongly oppose any pre-emptive strike against Iraq or any other country,
- We totally reject the waging of war for the strategic and economic advantage of the dominant Western powers.
- We sound a warning about the dire consequences of further destabilising the entire region.

We assert the need for:

1. acting in accordance with international law
2. working cooperatively to achieve international security with an emphasis on the just and non-violent resolution of conflict.
3. a full comprehensive parliamentary and public debate, including a full Senate inquiry on foreign and defence policy objectives.

The Australian Greens resolve to campaign actively in support of this resolution.

Iraq October 2006

Adopted at National Conference, Oct 2006

That the Aus Greens Nat Conference

- a. notes:
 - The recent study by John Hopkins University that estimates more than 650 000 Iraqis have died since the invasion of Iraq in March 2003, as a result of the conflict and that more than a third of deaths are attributed to actions of coalition and
 - That more than 3 000 coalition troops have died and

Calls on the Government to immediately withdraw Australian troops from Iraq
