

*The Greens have a bold vision...  
to have Australia powered by  
renewable energy within a decade.*

**THE GREENS  
JOBS**

While the Rudd Government drags its heels with unacceptable climate targets and bad legislation, giving billions of dollars in corporate welfare to Australia's biggest polluters, we can see a brighter future for Australia and the planet if we take urgent action now.

#### **Let's Repower Australia:**

- A new generation of climate jobs
- Stop logging
- Energy efficiency
- A public transport plan

#### **What you can do:**

- Visit [www.greens.org.au](http://www.greens.org.au), see our vision and sign the petition
- Get involved in your local climate action group
- Join the Australian Greens

# **REPOWERING** Australia

# REPOWERING Australia

## Repower Australia

The Greens have a bold vision to have Australia powered by renewable energy within a decade.

## A new generation of climate jobs

A rapid transition to a renewable energy economy will create new industries with high paying jobs. The Greens would redirect the billions of dollars of subsidies currently going to coal and polluting industries into clean technologies. We also want policies that support increased investment in technologies that work, like wind, solar, and geothermal.

## Stop logging

Stopping logging of old-growth forests would reduce greenhouse gas pollution by 20% overnight. It's the single biggest thing we can do to combat climate change.

## Energy efficiency

Through large-scale nationwide retrofitting and energy efficiency projects, we can have lower home energy costs, reduce greenhouse gas emissions and create a new generation of green-collar tradespeople.

## A public transport plan

We can Repower Australia by redesigning our cities around urban villages, linked by fast, convenient and safe buses, trains, trams and ferries. Regional centres must be connected by better rail services to reduce reliance on air travel and create a world-class freight distribution network. Australia is the only OECD country without Federal public transport funding: we must change this.
